PROJECTS

E-commerce Platform

Duration - 2 months

- I used HTML, CSS, and JavaScript to build a website that looks good on all devices and is easy to use.
- I developed this e-commerce website to gain my practical knowledge and valuable experience,
- Applying what I've learned to create a user-friendly and visually appealing online shopping platform.

Effective Analysis Of Hypokinetic Rigid Syndrome.

Duration - 4 months

- Built with HTML, CSS, JavaScript for the interface, Python and Django for backend processing, and SQL for data storage.
- To Develop a user-friendly website to collect and analyze symptoms of hypokinetic rigid syndrome.
- It aims to improve understanding and management of the syndrome through organized symptom tracking and analysis.

AgriMart

Duration - 2 months

- Designed and developed a responsive frontend for a platform enabling farmers to list products and factories to search and communicate.
- Implemented role-based login, product listing pages, search functionality, and user-friendly interfaces using HTML, CSS, JavaScript, and Bootstrap.
- Focused on creating an intuitive and visually appealing experience for seamless interaction.
